Muscular System Muscles of the Human Body
May 13th, 2019 - Muscles are the only tissue in the body that has the ability to contract
and therefore move the other parts of the body. Related to the function of movement is the muscular system’s second function—the maintenance of posture and body position. Muscles often contract to hold the body still or in a particular position rather than to cause movement.

**Is There a Difference Between Female and Male Muscles**

January 14th, 2011 - Generally the muscles of men and women are the same and will perform and respond in a similar manner. However, men can develop more muscle mass than women. The activities of both sexes differ, which is why muscle group development will change depending on your current exercise program and lifestyle.
