Influenza virus RNA genome virology
April 16th, 2019 - Within the influenza A virion are eight segments of viral RNA. These molecules carry all the information needed to make new influenza virus particles. These eight RNAs are shown schematically as olive green lines at the top of the illustration. RNAs are chains of four different nucleotides: A, C, G, U. In the case of influenza virus, these nucleotides are used to form the RNA genome.

Resistant Starch: Friend, Foe, or Lover Digestive
April 18th, 2019 - Since my first article on resistant starch RS titled Resistant Starch – Friend or Foe raw unmodified potato starch or RUMPS as I like to call it continues to light up the blogosphere. Like a lot of people I was caught off guard by the overwhelmingly positive light RUMPS has been cast in.

Love in the Fourth Dimension: Annual Review of Psychology
April 19th, 2019 - Psychologists' efforts to understand love began in the mid-twentieth century. The fact that they continue apace in the twenty-first century reflects increased awareness of the importance of love to understanding relationship phenomena and acknowledgment that an understanding of love has yet to be achieved. This article describes one source of increased recognition that the present.

Cardiovascular Disease Risk Tests: Medical Clinical
April 17th, 2019 - Footnotes for Framingham point scoring. Note Framingham risk scoring for men and women is presented in the Appendix below. Aetna considers hs CRP testing experimental and investigational for all other indications including use as a screening test for the general population and for monitoring response to therapy because its clinical value for these uses has not been established.
